

Experimental page : ratios of curve fit deaths to curve fit confirmed cases (CFR)

Excess deaths as a Z score:

Above based on Z score of two standard deviation from 2017-2019. What follows is cumulative plot of same.

Data in recent weeks are incomplete. Only 60% of death records are submitted to NCHS within 10 days of the date of death, and completeness varies by jurisdiction. Data are not weighted and counts are likely
